Guangming Technology Industrial Park (HQ)

With covering a floor area of 13,800 m² and building area of 34,700 m², it is located in Gongming Street, Guangming New District, Shenzhen. Based on the overall planning idea of Modern, Green and Environmental Protection, Guangming Industrial Park is made up of office, R&D, Sales and production with a three-dimensional greening design.

COMPANY PROFILE

- Founded in **2002**, listed in stock in **2010**.
- **12** R&D centers, more than **1050** patents, a laboratory qualified with CNAS, ACT from TUV-SUD, WTDP-UL.
- **16** subsidiaries, **2** manufacturing bases, over **3000** employees.
- Products exported to more than **60** countries and districts.
- **9** Overseas Subsidiaries:
Russia, India, Thailand, UAE, Italy, UK, Germany, Australia, Mexico.
- **Business:**
Grid-tied solar inverter, off-grid inverter, hybrid inverter, energy storage converter, solar pumping inverter, EV charging pile, UPS, etc.

Suzhou Industrial Park

With more than one hundred and thirty thousand square meters covered area, it locates in Science and Technology City of high-tech zone, Suzhou, China. The building area of factory has over 40,000 m² for the production line. In order to promote the new concept of energy conservation, Suzhou Industrial Park is constructed with a design of low-carbon ecological environment. For example, the rainwater collection system can be reused for greening and watering.

Development History

INVT was founded First Generation Inverter was developed on our own	Annual sales amount broke 100 million RMB Successfully changed to be the holding company limited. starting to expand overseas market	Acquired the certificate of High-new Technology Enterprise at National Level	Group development, development and extension of business areas	Completion and starting operation of INVT Suzhou Industrial Park Phase	Layout electric vehicle charging technology business	Completion and starting operation of INVT Guangming Technology Industrial Park
2002	2006	2009	2011	2014	2016	2018
Internationally advanced technology level vector control frequency inverter was launched successfully	2007 Elected as the first of "Top 10 of Domestic Industry"	Listed public in stock A market of Shenzhen Stock Exchange (the stock is simplified as INVT, code 002334)	Ground-breaking of INVT Shenzhen Guangming Technology Industrial Park	Initial completion of group brand integration, gradually forming of industrial automa- tion and energy power two business areas	INVT Group 15 Years Anniversary	
2005	2007	2010	2013	2015	2017	

Corporate Culture

- 1 Vision**
To be the globally leading and respected provider for products and services
of industrial automation and electric power.
- 2 Mission**
Make all efforts to offer value-added products and services to strengthen
client's competitive advantages.

- 3 Core Value**
Work together and keep improving.
- 4 Business Concept**
Sincere, Credit standing, Professional and Ambitious.
- 5 Business Policy**
market-oriented and customer-centric.

Our Advantage

R&D (Research and Development)

INVT regards research and development innovation as vitialities of the company. In order to make the products and solutions of INVT more and more perfect, INVT builds the core competitiveness of the company and creates the value of the customer's society through strategic implementation such as independent innovation, operational excellence management and human resource development. In order to realize the value of technology, the brand and quality of INVT have been achieved.

laboratories

1050

More than 1050
pcs of patents

- The National CNAS Laboratory.
- The UI Eyewitness Laboratory Qualification.
- TUV Eyewitness Laboratory Qualification.
- The First Industrial Control Industry To Add Mark TUV-mark Manufacturers In China.
- The First Industrial Control Industry To Obtain The Act Qualification From TUV In China.

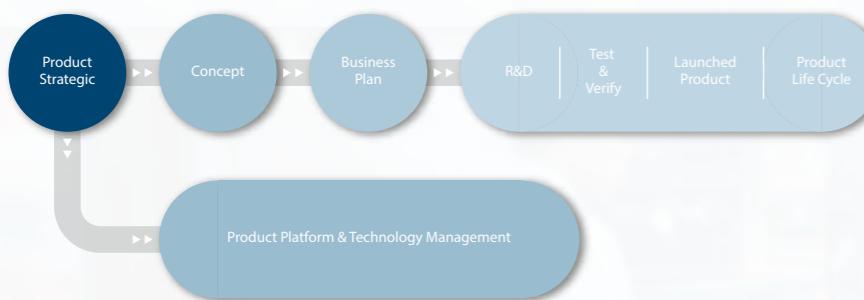

Enterprise Honor

We are not only pursuing honors, but also pursuing customer recognition. Every glory is not only an affirmation but also an inspiration to us. It makes our pace more determined.

- Global Top 500 New Energy Enterprises
- Best Solar-Storage-Charge Integration Solution Award of China's Energy Storage Industry in 2018
- Best Energy Storage Industry Supplier Award of China's Energy Storage Industry in 2018
- National High-tech Enterprise
- Outstanding Green Contribution Award
- Industrial and Commercial PV Leading Brand of China
- Top 10 Most Popular PV Residential System Brands in 2018
- Top 10 Most Popular PV Distributed Inverter Brands in 2018
- Top 10 Most Popular PV Storage Inverter Brand Suppliers in 2018
- CREC Excellent Inverter Enterprise in 2018
- Top 10 PV Inverter Suppliers
- Best Influential Brand in 2018

Why INVT Solar

- Experienced R&D team.
- Professional Products R&D Process.

Reliable Product Design

- All components are verified by strict tests and key components supplied by international top brands.
- Heat dissipation performance is ensured by system level thermal simulation for long service life.
- 6 laboratory validations: device test, safety test, EMC test, functional performance test, environmental test and reliability test.

Strict Product Quality Control

- More than 17 years mature experience of manufacturing processes.
- Two manufacturing bases in Shenzhen and Suzhou.
- With smart manufacturing production line: Automatic integration line, automatic integrated spraying line, AGV automatic material distribution and storage system.
- Using advanced supply chain management model, strict quality management system, efficient operation, perfect production, timely application.
- 9 steps of inspections and tests during production process.

Guaranteed Usage

- 7x24 service.
- 24 hours quick response.
- The products are insured by well-known international property insurance company (AIG) for Products/Completed Operations Liability insurance.

Efficient

- Wider voltage range, lower starting voltage and higher conversion efficiency.
- External inductor, reduce internal temperature.

Smart

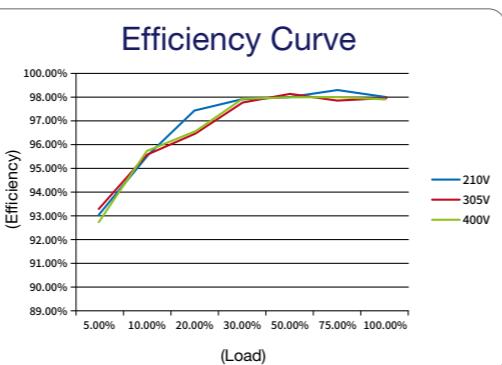

- Grid self-adaptation to meet various grid access requirements.
- Integrated global monitor management, APP with one-button registration, HMI is optional.

Reliable

- Aluminum casing, natural cooling, IP65 protection level.
- International famous brand components to ensure stable operation.

Simple

- Home appliance style.
- Small in size, light in weight, easy to install.

Monitoring Solution

Efficient

- Wider voltage range, lower starting voltage and higher conversion efficiency.
- Adopt combined technology of T-type three level topologies and SVPWM.
- External inductor, reduce internal temperature.

Smart

- Grid self-adaptation, no N-line AC design to meet various grid access requirements.
- Integrated global monitor management, APP with one-button registration.

Reliable

- Aluminum casing, natural cooling, IP65 protection level.
- Adopt internationally famous brand components to ensure stable operation.

Simple

- Home appliance design, easy to operate.
- Small in size, light in weight, easy to install by a single person.

BG12KTR | BG17KTR
BG15KTR

Efficient

- Wide input voltage range, adapt to all kinds of solar panels and string configuration.
- Dual MPPTs allow unbalanced input power. One MPPT max. input power is up to 60% of total input.
- Adopt combined technology of T-type three level topologies and SVPWM.

Smart

- AC output power is adjustable between 1-100%.
- Grid self-adaptation, no N-line AC design to meet various grid access requirements.
- Integrated global monitor management, APP with one-button registration.

Reliable

- IP65 protection level, suitable for various installation environments.
- Advanced film bus capacitors, latest thermal simulation technology for longer lifespan.

Simple

- High power density, small size.
- Modular design, easy to maintain.

 BG33KTR

Efficient

- Wide input voltage range, adapt to all kinds of solar panels and string configuration.
- Dual MPPTs allow unbalanced input power. One MPPT max. input power is up to 60% of total input.
- Adopt combined technology of T-type three level topologies and SVPWM.

Smart

- AC output power is adjustable between 1-100%.
- Grid self-adaptation, no N-line AC design to meet various grid access requirements.
- Integrated global monitor management, APP with one-button registration.

Reliable

- IP65 protection level, suitable for various installation environments.
- Advanced film bus capacitors, latest thermal simulation technology for longer lifespan.

Simple

- High power density, small size.
- Modular design, easy to maintain.

Energy Storage Inverter

BD3KTL-PS

Efficient

- Professional BMS, three charging stage, lead-acid battery and lithium iron are compatible.
- Voltage and current charging setup are available.
- Charge and discharge time is adjustable, Maximizing the peak cutting and valley filling performance.

Smart

- RS485*2, CAN*1(lithium battery), WiFi (optional).
- Multiple monitoring modes: APP, website.
- 50Hz/60Hz auto adaptation.

Reliable

- IP65 protection.
- Use international top brand components, with perfect protection function.

Simple

- Small in size, light in weight, easy to install.
- Friendly HMI, 4.3-inch LCD display.

BD3KTL-PS	
AC grid parameters	
Rated output power (W)	3000
Max. output current (A)	13
Rated output voltage (V) / frequency	230, L+N+PE, 50Hz/60Hz
Power factor	≥0.99(±0.95 adjustable)
THDi	≤3%(at rated power)
Max. output fault current (A)	50
Battery	
Battery type	Lithium battery or Lead-acid battery
Rated voltage (V)	48
Max.charging current (settable) (A)	60
Max. discharging current (settable) (A)	65
Charging curves	Three stage
Max. efficiency	93%
Protection	
Protection	DC breaker, AC short-circuit protection, Over current protection, Over voltage protection, Isolation protection, RCD, Surge protection, Anti-island protection, Over-temperature protection, Ground fault monitoring, etc.
Others	
Isolation method (battery side)	High-frequency isolation
Degree of protection	IP65
Dimension (H x W x D mm)	360x150x507
Operating temperature range	-25°C~+60°C
Cooling method	Air cooling
Relative humidity	4~100%, condensation
Display	LCD
Communication interface	RS485(standard); WiFi(optional)、 CAN-BUS
Grid qualification	VDE-AR-N4105, AS4777/3100
Warranty (years)	3/5

Efficient

- Integrated EMS function, safe and stable power supply,
- maximum energy utilization.
- Wide battery voltage range.

Smart

- Multiple working modes can be set flexibly.
- PV controller can be expanded, capacity can be flexibly configured.

Reliable

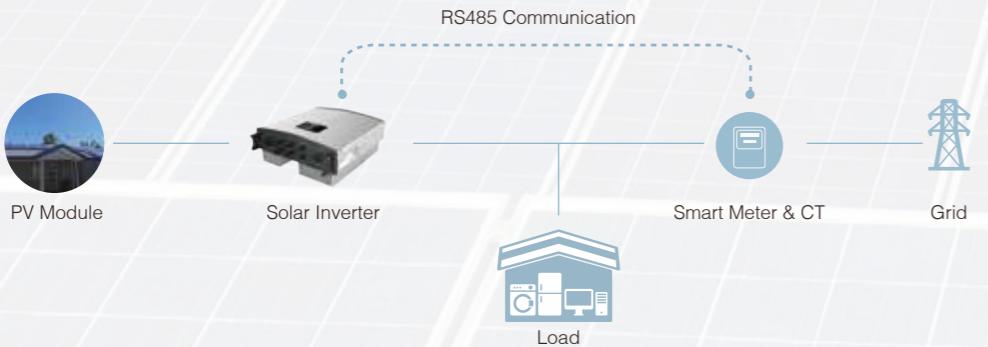

- Battery capacity and discharge time prediction.
- Compatible with lead acid and Lithium battery.
- Built-in isolation transformer, strong load adaptability.

Simple

- Easy to install, transport and maintain.

Smart power output control system

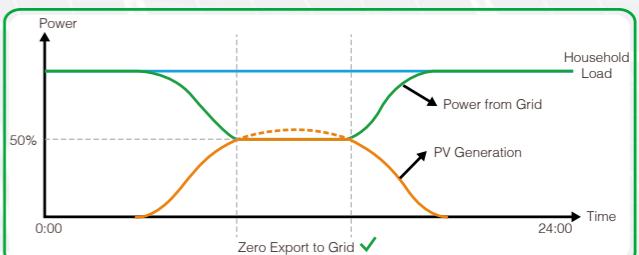

Solution For Residential PV Plants

Description

With intelligent output power control function, the system detects the power from grid in real time. Based on the principle that the direction of power flow can be only from grid to load, the inverter adjusts its output power to maximize use of PV energy while prevent energy from feeding back to grid at the same time.

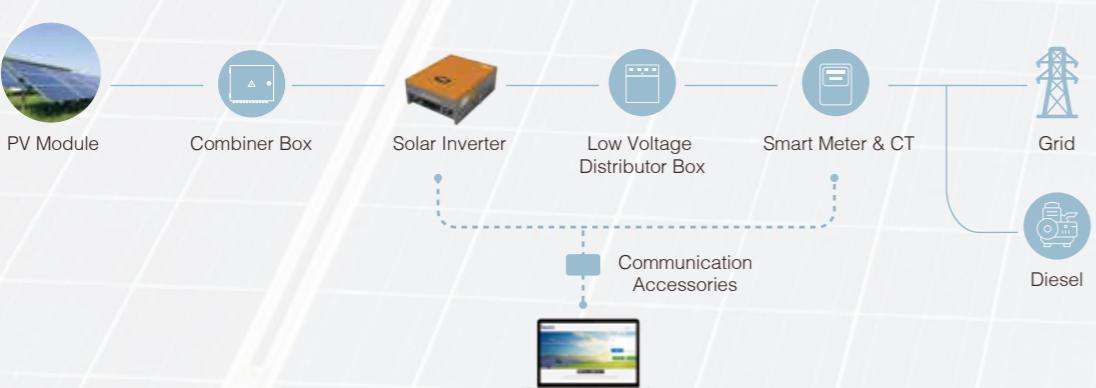

System with intelligent anti-feedback function

Advantages

1. Adaptive to different grid regulation (FIT, NEM...) and system capacity;
2. High cost-efficient;
3. Easy to install;
4. 0~100% output power automatically control.

Solution For Commercial PV Plants

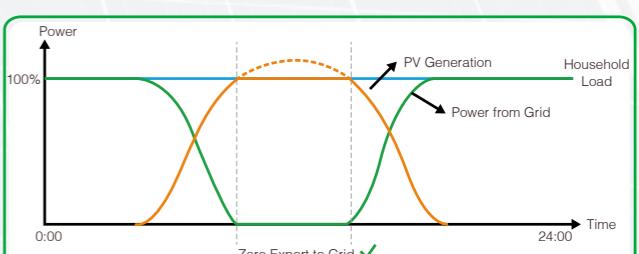

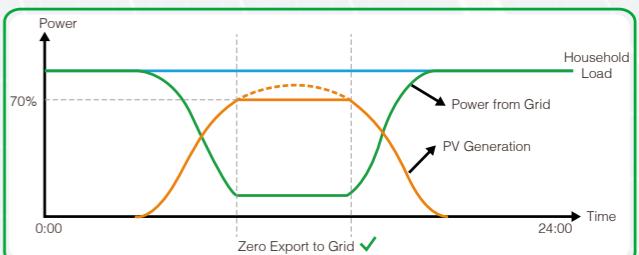

Anti-feedback Device Package

ATF200-A
Current Transformer x 1
Single Phase Smart Meter x 1

ATF200-B
Current Transformer x 3
Three Phase Smart Meter x 1

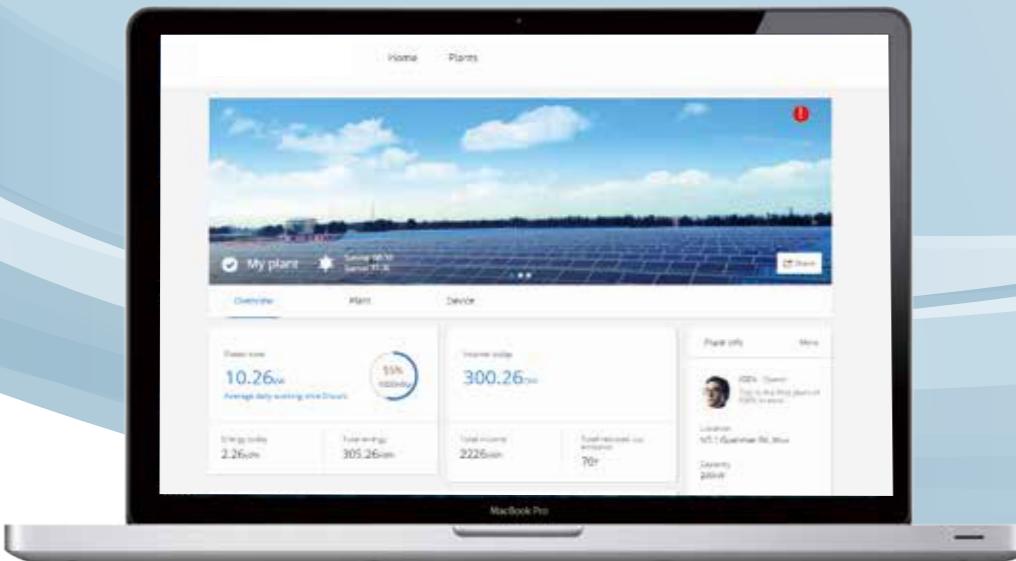

Monitoring Solution

We can provide our customers with a flexible internet monitoring solution which is suitable for residential, commercial rooftop systems and PV power plants. System monitoring device is user-friendly and reliable. It can transmit Real-time data to our server via internet. Customers can login website or use APPs to check power plant information.

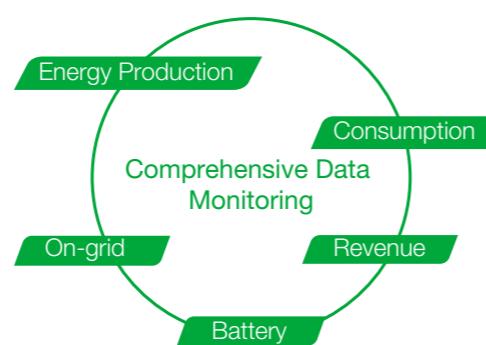

SOLARMAN HOME WEB

home.solarman.cn

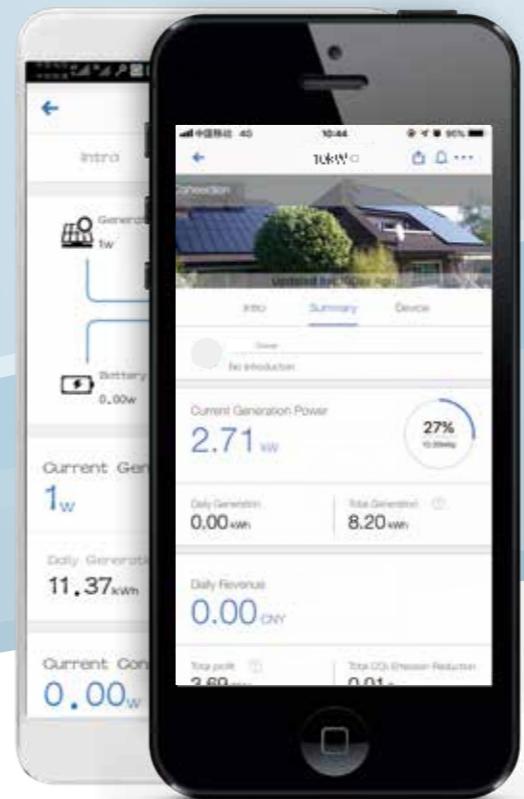

One-step management PV platform to share with 150,000 users worldwide

- Web-based management and monitoring, with cloud platform support.
- Compatible with various equipment: string inverter, battery storage inverter, micro-inverter, combiner, meter, meteorological sensor, etc.
- Various & intuitive icon, clearly display plant data: historical/real-time yield, solar source, etc.
- Real-time alerts & customized reports.
- Open API for easy integration into corporate or personal websites
- New social-networking function: follow other plants, share ideas.
- Stimulate PV plant building, assess system revenue before building actual plants.

SOLARMAN HOME APP

iOS
 Android

- Compatible with various devices, monitor system status comprehensively.
- New configuration function, simple on-site configuration merely with a smartphone.
- Customized PV plant profile, upload pictures of your own plants.
- Interact and share experience with SOLARMAN users worldwide.

SOLARMAN PRO WEB

pro.solarman.cn

One-step management PV platform to share with 150,000 users worldwide

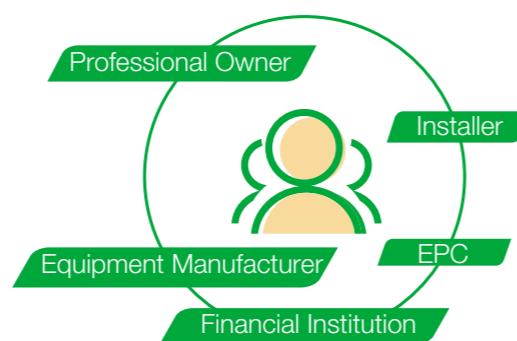

5 Function modules, lifecycle management of PV plant

Plant Construction

- PV resource evaluation
- Site selection and analysis
- Plant simulation
- Energy/income forecast

Plant O&M

- Plant data monitoring Real-time fault alarm
- Remote troubleshooting & debugging
- Online work order management
- Analysis & statistics on fault

Analysis & Statistics

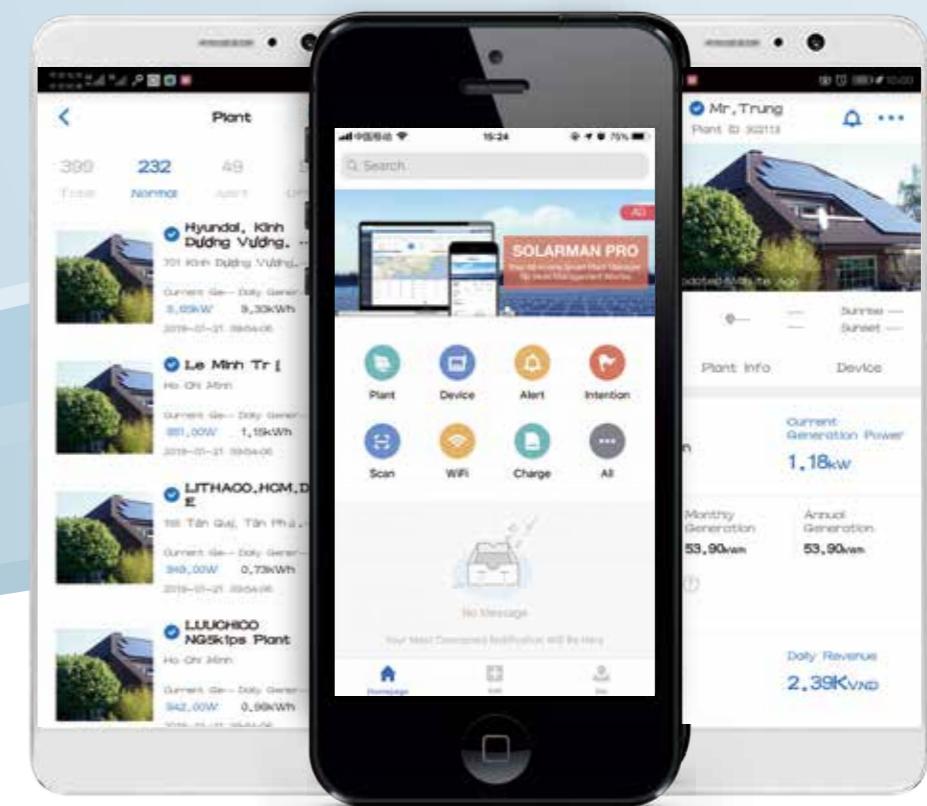

- Plant data statistics
- PR analysis and comparison
- Customized reports
- Regular online delivery of reports

Resource Sharing

- Global information sharing
- Online business cooperation
- Installer/O&M providers recommendations
- Fast plant construction

Asset Evaluation

- Plant asset evaluation
- ROI analysis
- Financial analysis/cash flow forecast

- GPS to facilitate site selection and plant construction.
- Connect logger directly, sending control commands (connect logger remotely to send control commands).
- Calculate estimated plant profit.
- Link plant owner.
- Personalized-recommending system.

IOS

Android

SOLARMAN PRO APP

Stick Logger

GPRS / WIFI / 5G / ETHERNET

- External light indicator, logging status at a glance.
- Plug and play, powered by inverter, no external power needed, easy to install.
- Independent from inverter to protect parts inside inverter, eliminate potential problems.
- Water-proof design, resistant to bad weather, enhance stability.
- External design, easier to replace faulty equipment.
- End user can monitor yields at any time with SOLARMAN APP.

	LSG-3	LSW-3	LSE-3
Remote communication	GPRS	WiFi	Ethernet
Frequency	GSM850/EGSM900/ DCS1800/PCS1900MHz	2.142GHz~2.484GHz	10M/100M
Antenna	External GPRS Rod antenna	External WiFi Rod antenna	—
Local communication	RS485/RS232/TTL		
Voltage	DC4.7V~DC15V		
Power consumption (W)	3	1	1
SIM card	Chip card		—
Memory	2MBYTE FLASH		
Operating temperature	-35°C~+80°C		
Operating humidity	<90%, non-condensation		
Number of connections	1		
Communication rate	9600bps(1200-115200bps Adjustable)		
Data collection intervals	Default 5min(1-15min Optional)		
	AT+Instruction Set		
User configuration	Remote server		
	Bluetooth 3.0 +EDR Configuration and access		—
Firmware upgrade	Remote		
Others	Real-time control, data resuming transfer		

Inverter Logger

GPRS / WCDMA
WIFI / ETHERNET

GPRS / WCDMA:

- Ensure completeness of collected data. [Data resuming](#)
- Devices can be upgraded and debugged remotely for easy maintenance. [Remote upgrade](#)
- Realtime alerts with immediate notification for fast troubleshooting. [Alert notification](#)
- Industrial-level SIM chip integrated for stable operation and high performance. [Stable performance](#)
- High network coverage around the world. [Global roaming](#)
- Quick installation and easy operation with Plug & Play function. [Plug & Play](#)
- Suitable for rural areas where network connection is not available.
- Check the system status anytime and anywhere via online portal or app, no additional software required.

WIFI / ETHERNET:

- Ensure completeness of collected data. [Data resuming](#)
- Devices could be upgraded and debugged remotely for easy maintenance. [Remote upgrade](#)
- Realtime alerts with immediate notification for fast troubleshooting. [Alert notification](#)
- Embedded Web Server for quick data access and simple configuration.
- Check the system status anytime and anywhere via online portal or app, no additional software required.
- 100M Ethernet port for high-speed data transmission via cable network.
